

Meena Nadi: Nature of Planets & The cause of different results in Navamsha

(Astrological Researches Group, January 8, 2016)

By Jitender Kumar

There are nine Planets, each having different nature, qualities, features etc. The nature of a Planet by means of Prakruti holds key about their results:

- Satvik Prukruti
- Rajsik Prukruti&
- Tamsik Prakruti

The nature wise categorization of Planets as follows:

- Satvik Planets: Mercury & Jupiter
- Raksik Planets: Sun, Moon and Venus
- Tamsik Planets: Mars, Saturn, Rahu & Ketu.

Important points to note here are:

- Satvik Planets give good results when they remain pure and unalloyed in their Satvik natur.
- Same rule applies to Rajsik and Tamsik nature Planets.

It is not harmful, if a Satvik gets Rajesik atmosphere and Rajsik Planet gets Satvik atmosphere, but they should not acquire the Tamsik atmosphere. And, a Tamsik Planet should not acquire the Rajsik or Satvik nature/atmosphere else, extremely bad results are possible.

Nakshatras are also categorized as per their lord's nature like Jupiter and Mercury owned Nakshtras are of Satvik nature.

Friendliness among Planets:

Planet	Satvik Friend	Rajsik Friend	Tamsik Friend
Sun	Jupiter	Moon	Mars
Moon	Jupiter	Ravi
Mars	Jupiter
Mercury	Venus
Jupiter	Sun	Moon
Venus	Mercury	Saturn, Rahu
Saturn	Mercury	Venus
Rahu	Venus
Ketu	Jupiter

Next important point to understand here is:

How a Satvik Planet can behave differently in same Navamsa Sign?

Navamsa means 9th part of a Sign, where each Sign is divided into 9 equal parts. *These 9 parts are also further allotted Planet/Sign lordship at "Sub-Level"*. Like, in Aries Sign, all 9 parts are allotted lordship starting from Aries to Sagittarius along with their Sign lords.

Like Jupiter in Aries Sign/Ashwani Nakshtra-4 Pada having Cancer Navamsa Sign and Jupiter is Cancer Sign/Hasta Nakshtra-4 having Cancer Navamsa.... In both conditions @ in Cancer Navamsa Sign... Jupiter is Exalted. But next point to check is: Ketu; Ashwani Nakshtra lord; is of Tamsik nature, while Moon; Hasta Nakshtra lord; is of Rajsik nature. So, in first condition, in Ashwani Nakshtra, 4 Pada, Jupiter is Tamsik Uccha. While in second condition, Jupiter is Rajsik Uccha

(Exalted) in Hasta Nakshtra, 4 Pada. So, Jupiter's result for same Navamsha will differ a lot.

This way, a Yog Karka Planet can also get failed to deliver good results during its period..... if its Nakshtra dispositor lord is inimical/afflicted or ill placed.
